

Dear Investor,

- We are honored to receive your interest and recognition for our project ParcelX. We use Ethereum smart contracts to receive investments and send GPX tokens to your wallet automatically. **The minimum investment amount is 1 ETH.**
- **We only support the wallets listed below for ParcelX investment:**
 - ♦ ImToken
 - ♦ JAXX
 - ♦ MetaMask
 - ♦ MyEtherWallet
 - ♦ Trust
 - ♦ CIPHER
 - ♦ MIST
- To ensure that your wallet will automatically receive the purchased GPX, please set 'Gas Limit' up to 200000 when transferring ETH funds. Please see the attached screenshots for a guide of how to do this with each supported wallet:

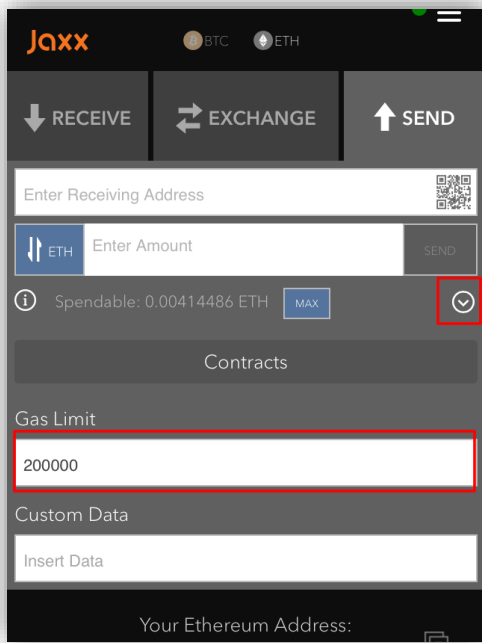

1. ImToken (iOS / Android)

Switch on the 'Advance' option, set the 'Gas Limit' to 200000.

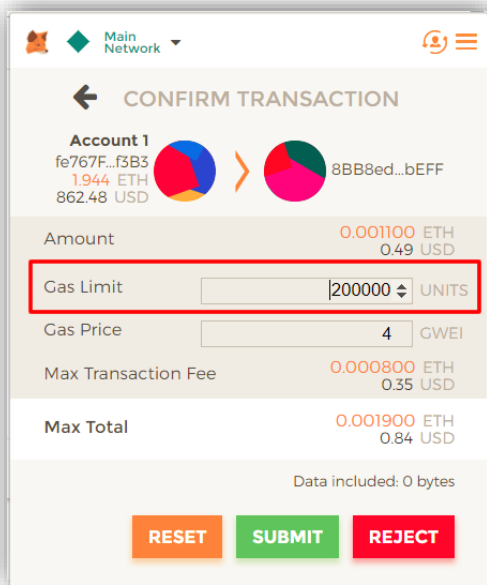

2. JAXX (iOS / Android / Browser Plugin)

Click the dropdown icon. Set 'Gas Limit' to 200000.

3. MetaMask (Browser Plugin)

In the confirm page, set the 'Gas Limit' to 200000.

4. MyEtherWallet (Browser)

Set 'Gas Limit' to 200000.

Gas Price (Gwei)
With a higher gas price, your transaction fee will be more expensive, but the Ethereum network will process your transaction faster.

Gas Limit
The gas limit prevents smart contracts from consuming all your Ethereum. We will try to calculate the gas limit automatically for you, but some smart contracts may require a custom gas limit.

0x

6. CIPHER (iOS / Android)

Clicking the right-top 'setting' icon, you will enter the Advanced Options. Set the 'Gas Limit' to 200000.

7. MIST (Windows / Linux / Mac Client)

In the 'send' panel, drop the 'SELECT FEE' to the MAX.
